Certificate of Completion

Mariusz Jendrzeczak

Badges acclaimed

**THIS CERTIFICATE RECOGNIZES PROVEN ABILITY TO BUILD, MAINTAIN AND SCALE
AI-FIRST SOFTWARE PROJECTS WITH AUTONOMOUS CODING AGENTS.**

Agentic Environment

- Setting up a fully AI-ready development environment in minutes.
- Structuring project context files as long-term memory for the Agent.
- Generating PRD documentation with AI support via the Socratic Method.
- Running Agents safely and autonomously in sandboxed environments.

10xDevs Workflow

- Planning an MVP roadmap with clear milestones and priorities.
- Running a repeatable Architect-to-Developer delivery pipeline with Agents.
- Reviewing and safely merging AI-generated code.
- Delivering a working MVP feature by feature.

AI Development Quality & Maintenance

- Automating test pipelines that feed results back to the Agent.
- Configuring a custom QA Agent for project-specific testing.
- Enabling self-healing fixes after failed tests.
- Debugging from stack trace to fix with AI support.

Innovate with Generative AI:

- Mapping existing codebases for fast Agent onboarding.
- Structuring nested context files for module-level understanding.
- Refactoring legacy modules into an Agent-ready state.
- Modernizing legacy systems with Agents using Domain-Driven Design.

Large scale & legacy projects

- Building a custom AI Agent for the team's tech stack.
- Running Massive Code Review pipelines for AI-generated code.
- Sharing a team-wide AI Registry of skills and rules.
- Delegating tasks to asynchronous Agent workers.

THE COHORT-BASED COURSE CONSISTED OF:

Prework, 25 lessons across 5 modules (Agentic Environment, 10xDevs Workflow, AI Development Quality & Maintenance, Large Scale & Legacy Projects, AI-Native Teamwork); 6 live sessions (a kick-off meeting, 4 Live Q&A sessions and a celebration event); weekly trainer office hours; constant support from the presenters; a custom AI Agent and internal AI tooling built end-to-end with AI support; and the opportunity to share experience and discuss with other participants.

Course Instructors:
